

Dear Parents and Carers,

At St Michaels we are enjoying science lots! As well as our lessons in class we also run a STEM (Science, Technology, Engineering and Maths) club and are looking forward to our Family Egg Drop Challenge on Thursday 6th April.

Another way we can enthuse our children for the STEM subjects is by visits from STEM Ambassadors. These are a community of 30,000 volunteers who are raising awareness and aspirations in STEM. There are already a couple of St Michael's parents who are STEM Ambassadors. We are writing this letter to try and recruit some more. Ambassadors are coordinated through 'all about STEM', who have the government contract for the STEM Ambassador Hub Merseyside and Cheshire. Laura Pilgrim, from 'all about STEM' will be at our egg drop event, and is also frequently found on the Early Years playground, picking up her children. If you are interested in becoming a STEM ambassador, you can complete the slip and return it to Mrs McLain via your child's teacher. Or please come along to our egg drop challenge, talk to Laura, or drop her an email on laura@allaboutstem.co.uk. She will then arrange a DBS check and help you know what to expect. You only need to do one activity a year to be an Ambassador, but if you were willing to come in to St Michaels we would love to have you. You might also like to check out the website www.allaboutstem.co.uk

Thank you for your support in helping our children enjoy these very important subjects.

Mel McLain (Science Co-ordinator) and Laura Pilgrim (allaboutSTEM)

I am interested in becoming a STEM Ambassador.
